THE REPUBLICAN NATIONAL CONVENTION.

A National Convention of the Republican party will meet at Chicago, Wednesday, the 31st day of June next, for the nomination of candidates to be supported for President and Vice President at the next election.

Republicans, and all who will co-operate with them in supporting the nominee of the party, are invited to choose two delegates from each Congressional District, four at large from each State, two from each Territory, and two from the District of Columbia, to represent them in the Convention.

J. D. CAMERON, Chairman.
 THOMAS B. KEOGH, Secretary.

REPUBLICAN STATE CONVENTION.

ROOMS OF THE
 REPUBLICAN STATE CENTRAL COMMITTEE,
 MILWAUKEE, February 14, 1880.

A State Convention of delegates representing the Republican party of Wisconsin, and of all who will co-operate with them in supporting the nominees of the party, is hereby called to meet at the Capitol in Madison, at twelve o'clock M., on Wednesday, May 27, 1880, for the purpose of electing in nomination an electoral ticket of ten electors to be supported by the party at the next Presidential election, and also to select twenty delegates, (two from each Congressional District and four from the State at large,) to represent the Republican party of Wisconsin in the National Republican Convention, which is called to meet at Chicago on the 31st day of June, A. D. 1880, and to transact such other business as may be deemed necessary.

Each Senate and Assembly District is entitled to two delegates in the Convention.

R. H. BAKER, Chairman,
 T. D. WELLS,
 J. H. PALMER,
 J. H. KETTER,
 J. L. SPOONER, Jr.,
 J. H. WAGGONER,
 R. BOWEN,
 J. R. BURMAN,
 L. F. FRISBY,
 State Central Committee.

The country will likely be called upon to decide which is the greater hero of the two—the hero Appomattox, or the hero of Copher Alley.

Mr. Tilden's war record does not "pan out" any better than Bayard's. When the old Democrats attempt to rake up each other's war record, one is found to be as deep in the mud as the other is in the mire.

It is suggested that Tilden and Fritz John Porter would not make a bad Democratic ticket. It would be a happy combination. What Porter tried to accomplish by cowardice during the war, Tilden attempted to accomplish by speech-making and fraud.

The last number of the Harper's Weekly contains a very excellent portrait of General Al Lucius Fairchild, of this State, who has been recently appointed Minister to Spain. The General left Wisconsin eight years ago to take the Liverpool consulate, and since that time he has not been in the States. His portrait represents him much heavier than when he left here in 1872, and his hair and beard give evidence that he is beyond the middle age of life. He is a representative man, and one of the best types of self-made men we have in this country.

It does not often happen that a legislative body toward the close of its session, refuses unanimously to adopt complimentary resolutions regarding its presiding officer. But we have an instance at Madison where five Democrats refused to vote for a resolution complimenting Mr. Speaker Arnold. These were Fleming, of Watertown; Kennedy, of Iowa county; Kreuger, of Winnebago; Keogh, of Milwaukee; and McIntyre, of Lafayette. For political reasons these five Bourbons refused to vote for the resolution. But that act is worse for them than for Speaker Arnold. He has made a very good Speaker, and we believe it will be generally conceded by all the members who are not blinded by prejudice and influenced by party spirit, that he has discharged the duties of the office impartially and courteously.

Only a short time ago—since January 1—Chauncey Slater, a foreman of a shop in Mansfield, Connecticut, fell heir to one hundred thousand dollars. Within a few days past, he received a check for \$93,000, the remaining \$10,000 to be sent as soon as the estate of the deceased relative can be settled. The most interesting part of the story is yet to be told. Mr. Slater seems to be one of those men—not great in number—who is endowed with rare common sense and commendable industry. When he received the fortune of \$90,000, a sum sufficient to turn the head of almost any other laboring man, he put the money in the bank unconcernedly, kept on his old working suit, and has decided to continue to be foreman of the shop. He is not that kind of a man to be swayed by fast horsesmen, neither can he be induced to invest, and thereby lose it, in aiver mines at Leadville.

There is annoying condition of things in New York city so far as blackmailing is concerned, and there does not appear to be power enough in the detective force of the city to arrest the scoundrels. Some one born of the spirit of hell, is trying to blackmail Rev. Dr. Dix, of Trinity Church. It is a game to make money and nothing else. Richard Grant White, is of the opinion that the villain is among Dr. Dix's friends, and not his enemies. Mrs. John Jacob Astor, is being followed in the same way. She and other ladies have been written to by unknown persons demanding a large amount of money, and if it was refused, their children would be kidnapped. Others in New York city have been persecuted in the same way during the past two or three months, and in order to free themselves from the clutches of the secret blackmailers, they have been compelled to open their purses liberally.

ON LAND AND SEA.

Particulars of the Loss of the Tug Lamont.

The Result of a Foolhardy Bet Made by Two Tug Captains.

The Lamont Found Near Pentwater Bottom Side Up.

All Hands on Board Supposed to Be Lost.

An Unlucky Pleasure Trip to Some Fort Howard Ladies.

Ex-Senator Burch's Testimony Before the Exodius Committee.

Lot M. Morrill's Views of the Prospects in Maine.

Donnis Kearney in the San Francisco Police Court.

Preparing to Rebuild the Deaf and Dumb Institution at Delavan.

Other Interesting State and Miscellaneous Items.

A FOOLHARDY BET.

Loss of the Tug Lamont Near Pentwater, Michigan.

PENTWATER, March 15.—The tugboat George Lamont and Gem started from this place yesterday forenoon at 9:34 for a trip to Ludington and back, the peculiar incentive to the trip being said to be a wager that one boat could beat the other, and in order to make the trip more binding, forfeit was said to have been put up, to be lost by the boat that turned back the Gem went to Ludington and came back safely; but the Lamont not being seen or heard from the Gem and another tug went out to look for her, and patrols on foot and horseback scoured up and down the beach.

The missing tugboat is Captain Lamont, the captain and owner of the boat, his son, George Lamont, aged 13, and Palmer Hill. The latter leaves a wife and Captain Lamont leaves a large family. The accident probably happened during the snow squall soon after the boats left this place. The principal facts relative to the loss of the tug Lamont are as first stated, but are modified somewhat by fuller details. It is now claimed that the principal object of the trip to Ludington on the part of the Gem was to take a pattern to the iron works in that city, and the Lamont was to be retained there, to have legs put under the boiler. On the other hand, it is not disputed that a bet of \$25 was offered by Captain Lamont on Saturday that the tug Lamont could leave the wire at the Pentwater ferry, turn under the wire at the Ludington ferry, and return to the starting point ahead of the Gem. The engineer of the Gem took the bet. Ten dollars was put up by each as forfeit, and the remainder put up by them on Sunday morning.

The sea was running high when the church bell rang the hour of 9, and the captain of the Gem says he tried to persuade Captain Lamont not to go out, and in return was taunted as a coward, and his tug called "an old paper boat." Further words only drew forth the reply: "If you can go I can." It appears that the captain of the Gem would not be bluffed, and the tug started off, turning back to score again on account of the Gem taking the lead. When crossing the wire the second time the signal was given, the tug passed the wire together, but the Lamont fell back as the mouth of the channel was reached and the Gem went out into Lake Michigan ahead. Seeing that the rival tug outlived the heavy sea, Captain Lamont followed, and although it at first seemed that his tug must inevitably be swamped, after a time apprehensions ceased and the crowd on the pier dispersed.

The Captain of the Gem says the Lamont turned back after running a mile and a half, and the engineer blew the whistle of the Gem twice. The Lamont headed for Ludington again, but after a little while turned back the second time, and was soon lost to sight, but when last seen by those on the Gem showed signs of distress. No one lives to tell more.

UNLUCKY TRIP.

GREEN BAY, March 15.—About half past seven o'clock last night a switch and freight engine of the Green Bay & Minnesota Railway Company collided near the round house in Fort Howard, resulting in the demolition of the tenders of both engines, and slight injuries to four women, who were in the cab of the freight engine.

The latter had just left the water tank and was backing down the main track to the depot, while the switch engine, which had left the yard at about the same time, was backing up the main track to the tank, and the approach of neither was discovered till late to avoid a collision. The injuries to the women were caused by the tender of the freight engine crashing into the cab. They were taking their first ride on a locomotive, "just to see how it felt," as one of them said. They all live in Ft. Howard and now consider that it is not as pleasant to ride on a locomotive as they had supposed, and are thankful that they escaped with no more serious injuries than some cuts and bruises. The engineer of the freight engine was also slightly bruised about the body.

MAINE.

Mr. Morrill's Views of the Political Prospects in Maine.

WASHINGTON, March 15.—Ex-Senator Lot M. Morrill, of Maine, Chairman of the Republican State Committee, is here visiting Judge Ady—General Dunn. He gives a glowing account of the future prospects of the Republican party in Maine, and believes that the State will be carried

by a rousing majority next November for the Presidential ticket. A great many Democrats were thoroughly disgusted with the course pursued by their leaders in their recent attempt to steal the State Government, and they evinced their dissatisfaction by voting against their party at the late elections. Mr. Morrill believes that a large number of Democrats will further emphasize their dissatisfaction of the course of their leaders by voting with the Republicans at the approaching election. Conservative Democrats were thoroughly alarmed at the revolutionary course pursued, and they are determined to put a seal of condemnation upon these acts which will be remembered by the Democratic leaders for a great many years to come.

TELLING THE TRUTH.

Ex-Senator Burch's Testimony Before the Exodius Committee.

WASHINGTON, March 15.—Ex-Senator Burch, of Louisiana, was before the Exodius Committee today. He said the efforts last winter by the Democrats to pass "the chain-gang law," and the uncertainty of the status of the colored people under the Democratic rule, prevented many from making the usual labor contracts in January and February this year, and the result is already observable in the large number of colored people who have moved from the planting districts into the cities and towns on the banks of the river, so as to take advantage of opportunities for transportation to the West.

He grouped the causes of the exodus under five heads, viz:

Fear on the part of the colored people of class legislation against them by Democratic legislators.

Fear of interference with their educational privileges.

The uncertainty of obtaining homes and security of retaining them.

Interference with their religious and personal rights.

Fear of disfranchisement.

He thought it not improbable that protection of his people in all their rights would produce the effect upon it has produced in the case of the Irish, German and English immigrants that have found their homes and educational advantages and civil and political rights in this country.

He believed that in right and justice the experiment should be tried. It would at least stop the exodus of his race. To the great change in the political complexion of the State, in some parishes, within the last few days as shown by the election returns he instanced Ouachita parish, where, in 1876, from 1,200 to 1,500 Republicans and 400 or 500 Democratic votes were cast, while at the last election the leading Democratic candidate polled 1,976 and the Republican candidate only eleven votes. This and similar changes, he said, were accomplished

by Democratic county returning boards. From five to seven police jurors were formerly elected in each parish as supervisors of election. Subsequently the Democrats passed a law authorizing Governor Nichols to appoint five. The additional police jurors appointed were all Democrats, and this gave the Democrats a majority of the police jurors or county returning boards, as witnesses called them, in every parish in the State, with one exception, and in this exceptional parish the Republican majority were driven away by armed Democrats.

He thought it was necessary for the Democrats to use force now to carry the election, as a legal machinery they have devised cables them "to count out any one they choose."

PROMOTIONS.

NEW YORK, March 15.—A cable dispatch from Rome to The New York Freeman's Journal, announces that yesterday the Pope approved and named Rev. Michael Heiss, now bishop of La Crosse, Wis., as coadjutor, with the right of succeeding, to the archbishop of Milwaukee, and approved and named Rev. John A. Waterson, president of Mount St. Mary's college, Emmitsburg, Md., to be bishop of Columbus, O.

FOUND GUILTY.

SAN FRANCISCO, March 15.—In the Police Court to-day Judge Rix rendered a lengthy decision in the case of Dennis Kearney on the charge of vulgar and threatening language against Spreckels. He held the defendant guilty on the ground that it was calculated to provoke a breach of the peace. The second charge, that of threatening to kill any person who should put against his life, the Court held could not be considered a crime, as the circumstances in which killing would be justified were recited as qualifying the threat. Sentence was reserved till to-morrow.

DEAF AND DUMB.

DELAN, Wis., March 15.—The full Board of Trustees of the Deaf and Dumb Institution held a meeting to-day, to consult with Architect Mix and the State Board of Charities on plans and specifications for the new institution buildings. The law authorizes no change in the plans adopted by the Legislature except such as are ordered by the State Board. It is the intention to push the buildings and work forward to completion as fast as possible.

FATAL FALL.

OCONEGOWOC, March 15.—A horrible accident occurred this afternoon, to Edward Schenckhorn, of this city, which will result fatally. He was engaged in shingling on the roof of A. E. Shedd & Co.'s ice house, and his foot slipping on the icy surface he was precipitated to the ground, a distance of sixty feet, striking on his head. He cannot survive the night.

THE NEW MEMBER.

MADISON, March 15.—In the Senate to-night, Governor Smith sent in the name of Mrs. M. J. Fairbanks, of Milwaukee, as member of the State Board of Charities, vice C. H. Hansen resigned. The nomination was confirmed.

A GREENBACK CROSS.

INDIANAPOLIS, March 15.—The wife of Adjutant General Rees received from the ladies in the treasury department at Washington to-day a small cross made of \$20,

000 in greenbacks that were ground in the treasury and molded. The present contains a quaint inscription.

PLEASANT HILL, Miss., July 5, 1879.
 Messrs. MORGAN & ALLEN, 59 John St., New York City:

I pray God that you may be spared many years to relieve others as you have me and my child. I have been taking medicine, almost daily, for thirteen years with scarcely any benefit, until the "Constitution Water" was brought to my notice. I have attended to my household duties the past week, for the first time in three months, the past month was the first month that I have escaped my severe sick head-aches. I take great pleasure in recommending "Constitution Water" to all my suffering friends. Very respectfully,
 Mrs. M. A. STATEN.

Ask your druggist for it.

value would have more than doubled itself before this time. It is taken down once a year when the treasury officials are making an examination of the office. It is dusted, looked over, and placed back on the shelf awaiting an owner. There is a chance for some of Andrew Jackson's heirs to have an act passed by Congress giving them a title to its valuable contents.

G. A. Sala on American Railroads and Newsletters.

From an interview in the San Francisco Chronicle.

"I consider that the American railroads traveling is now so wonderfully comfortable that the inconveniences have been brought down to their minimum. It is all the more remarkable because the change for the better has been wrought in so short a time, for when last in America (during the time of the war) the carriages were low and stuffy, the apologies for sleeping cars full of dirt and flies, and everything calculated to make one's life on the hotel car which brought us from Chicago to Omaha were as comfortable as though reading the 'Sentimental Journey' in the best London club rooms instead of making a practical journey some thousands of miles long. This side of Omaha we have been nearly as comfortable, but in point of attendance and accommodation, the Union Pacific has a slight advantage over the Central."

"Besides," continued Mr. Sala, confidentially, "a colored gentleman, with burlesque musical leanings, although he would surely form a valuable acquisition to a married party, would not be my choice for a railway attendant."

"Compared with the European railways how do these of America stand?"

"Oh, to the immeasurable advantage of those of America," replied Mr. Sala. "It would be impossible to make the journey we have made, for San Francisco and New Orleans are the terminal of this trip—it would be impossible to make such a trip in Europe without being fatigued into utter helplessness, while now we feel that a bath will render us as nimble and lively as could be expected of two people who have only an uncertain number of years to live."

The entrance of a new paper turned the conversation upon newspapers. Asked his opinion upon American journals, Mr. Sala said: "In their manner of succinctly presenting news—that is, in the epitomizing of information—the American papers are far ahead of the English, but they seem to lack the element of solidity—solidity, if you will, have noticed an almost entire absence of what we call heavy 'leaders' which in England are all-powerful. To give you an illustration of what I mean, interesting because of the result reached and not as being in my experience: You know Temple Bar, that wretched old obstruction to Fleet-st., has been removed. Our paper, The London Daily Telegraph, made a solemn covenant with me that once a month I was to write a leader against the old Bar until it was taken down. Iconoclastic as this proceeding was, and conservative as we English people are, this persistent attack on a fact which had become an element of past times attained its result, and Fleet-st. is now clear."

"In America this monthly attack made in heavy, sober earnest would, I presume, be without the least effect, for here if a thing is to be written up or down it must be done pungently and at once. To convince you of the value I place upon American journals or newspapers, I can assure you that during this last absence from England I have not thought it worth while to look at an English paper, because I have felt sure that all the information I have necessary for me to gain could be gathered from the American daily publications."

THE BOX.

It lies unclaimed and unopened in the Treasury.

Special Correspondence.

WASHINGTON, March 11.—In the vaults of the Treasury Department there is a box which was placed there over thirty years ago for safe keeping. No one knows who it belongs to, or what is to be done with it. It has been the subject of several investigations by officers of the Treasury Department. On various occasions resolutions have been introduced in Congress making inquiries, etc., as to its value and ownership, but no satisfactory conclusion has ever been had as to its true history. Its contents are worth perhaps \$2,000 or \$3,000. The box remains in the Treasury vault, tightly sealed and covered with dust. No one can touch it unless Congress pass a resolution to that effect. Several United States treasurers who have found the box in their possession, when taking charge of the office, have recommended that the articles be sold at auction and the proceeds given to some charitable object or monument association.

There are several stories told as to the origin of the box. One is that the contents were a present to President Andrew Jackson from the Khedive of Egypt, and were placed in the Treasury for safe keeping. Another, and probably a more correct, history of the box is found in a report made by Secretary McCulloch in answer to a resolution of the House of Representatives. His letter is dated March 10, 1868, and he says:

In answer to your resolution of the 6th inst., inquiring as to the contents of a certain box in the vaults of the treasury, sealed with the seal of the patent office, and marked 'Jewels,' an examination has been made by the treasurer, and a copy of his report is herewith submitted. It is understood that the articles are remnants of the objects of an extensive robbery committed a number of years since at the patent office. They have been in the treasury vaults since 1851. I can see no reason for retaining the jewels, and they certainly serve no good purpose in their present condition, and I respectfully recommend that they be sold at auction and the proceeds covered into the treasury. Respectfully, etc.

HUGH McCULLOCH

Secretary of the Treasury.

Sir: In pursuance of your direction issued upon an attested resolution of the house of representatives, passed March 6, 1868, I have the honor to report that the box in the vaults of the treasury, sealed with the seal of the patent office, and marked 'Jewels,' was opened by me in the presence of the cashier. There was found there a memorandum in writing, of which the following is a correct copy, to-wit:

A list of articles in the box.

Bottle said to contain attar of roses.

One vial containing pearls.

One vial containing diamonds.

One gold plate—inside hinge of a snuff-box.

One paper containing a gold ornament and a silk tassel belonging to a necklace.

A paper containing thirteen diamonds and four pearls.

Two lumps of gold.

The vial containing pearls and the one containing the diamonds are both sealed and were not opened. I should judge that the pearls number from two to three hundred. They are pretty uniform in size, being about as large as a small pea, except two, which were quite large and pear-shaped. The diamonds are small and about one hundred in number. The two lumps of gold, if of real fineness, and they seem to be—are worth somewhat over \$800. The attar of roses is probably of some value. The diamonds are, of course, quite valuable.

Respectfully,

F. E. SPINKER.

Treasurer of the United States.

The box, of course, is of no earthly use to any one. If the contents had been sold and the proceeds placed on interest, their

value would have more than doubled itself before this time. It is taken down once a year when the treasury officials are making an examination of the office. It is dusted, looked over, and placed back on the shelf awaiting an owner. There is a chance for some of Andrew Jackson's heirs to have an act passed by Congress giving them a title to its valuable contents.

G. A. Sala on American Railroads and Newsletters.

From an interview in the San Francisco Chronicle.

"I consider that the American railroads traveling is now so wonderfully comfortable that the inconveniences have been brought down to their minimum. It is all the more remarkable because the change for the better has been wrought in so short a time, for when last in America (during the time of the war) the carriages were low and stuffy, the apologies for sleeping cars full of dirt and flies, and everything calculated to make one's life on the hotel car which brought us from Chicago to Omaha were as comfortable as though reading the 'Sentimental Journey' in the best London club rooms instead of making a practical journey some thousands of miles long. This side of Omaha we have been nearly as comfortable, but in point of attendance and accommodation, the Union Pacific has a slight advantage over the Central."

"Besides," continued Mr. Sala, confidentially, "a colored gentleman, with burlesque musical leanings, although he would surely form a valuable acquisition to a married party, would not be my choice for a railway attendant."

"Compared with the European railways how do these of America stand?"

"Oh, to the immeasurable advantage of those of America," replied Mr. Sala. "It would be impossible to make the journey we have made, for San Francisco and New Orleans are the terminal of this trip—it would be impossible to make such a trip in Europe without being fatigued into utter helplessness, while now we feel that a bath will render us as nimble and lively as could be expected of two people who have only an uncertain number of years to live."

The entrance of a new paper turned the conversation upon newspapers. Asked his opinion upon American journals, Mr. Sala said: "In their manner of succinctly presenting news—that is, in the epitomizing of information—the American papers are far ahead of the English, but they seem to lack the element of solidity—solidity, if you will, have noticed an almost entire absence of what we call heavy 'leaders' which in England are all-powerful. To give you an illustration of what I mean, interesting because of the result reached and not as being in my experience: You know Temple Bar, that wretched old obstruction to Fleet-st., has been removed. Our paper, The London Daily Telegraph, made a solemn covenant with me that once a month I was to write a leader against the old Bar until it was taken down. Iconoclastic as this proceeding was, and conservative as we English people are, this persistent attack on a fact which had become an element of past times attained its result, and Fleet-st. is now clear."

"In America this monthly attack made in heavy, sober earnest would, I presume, be without the least effect, for here if a thing is to be written up or down it must be done pungently and at once. To convince you of the value I place upon American journals or newspapers, I can assure you that during this last absence from England I have not thought it worth while to look at an English paper, because I have felt sure that all the information I have necessary for me to gain could be gathered from the American daily publications."

JOHNSTOWN.

Tally one for Albert Cook. It's a twelve

Charles Beldin, formerly of this town, now of Waukegan, is worse at the present writing. He went to Colorado for his health, a short time ago, but failed to derive any benefit in the refreshing air of the silver lined commonwealth.

No need of much sickness. Our little town is very well supplied, with four doctors.

The social at Brother Cole's last week was well attended both afternoon and evening. The old folks enjoyed themselves in the afternoon there being light chatting, and a small spread of tempting delicacies to satisfy the physical appetite. The young folks with games and a good time in general.

Mrs. F. Myers has gone to Waukegan to see her brother, who is quite sick with consumption.

Strike once more for Stephen Bowerman, it's a girl again.

The rag party at D. Water's, Friday, was well attended. There was more fun than work, and in the evening they enjoyed themselves tripping the light fantastic.

A Fair Offer.

The Voltaic Belt Company, Marshall, Michigan, will send their Celebrated Electro-Voltaic Belts and other Appliances to the afflicted upon trial. A sure cure guaranteed for all diseases of a personal nature, Nervous and Debilitated systems resulting from unnatural causes. Also, for all diseases of the Liver, Kidneys, Rheumatism, Paralysis and many other diseases. For full particulars, address as above.

TESTIMONIAL TO MR. FELLOWS.

WE, the undersigned, Clergymen of the Methodist Church in Nova Scotia, having seen the preparation known as FELLOWS' COMPOUND SYRUP OF HYPOPHOSPHITES, prepared by Mr. JAMES FELLOWS, Chemist, St. John, N. B., and having known cases wherein its effects were beneficial, believe it to be a reliable remedy for the diseases for which it is recommended.

FELLOWS' COMPOUND SYRUP OF HYPOPHOSPHITES.

Speedily and permanently cures Congestion of the Lungs, Bronchitis, Consumption, Nervous Prostration, Shortness of Breath, Palpitation of the Heart, Trembling of the Hands and Limbs, Physical and Mental Depression, Loss of Appetite, Loss of Energy, Loss of Memory, and will rapidly improve the weakened functions and organs of the body, which depend for health upon voluntary, semi-voluntary and involuntary nervous action. It acts with vigor, gentleness and sublimity, owing to the exquisite harmony of its ingredients, akin to pure blood itself. Its taste is pleasant and its effects permanent.

Look out for the name and address, J. F. FELLOWS, St. John, N. B., on the yellow wrapper in water-mark, which is seen by holding the paper before the light.

Price, \$1.50 per Bottle. Six for \$7.50.

SOLD BY ALL DRUGGISTS.

BITTERS

STOMACH

The Bitters invariably remedy yellowness of the complexion and white of the eyes, pains in the right side and under the shoulder-blade, vertigo, tongue, high colored urine, nausea, vomiting, dyspepsia, constipation, heaviness of the head, mental depression, and every other manifestation of an impure or disordered condition of the liver. The stomach, bowels and kidneys also experience their regulating and tonic influence.

For sale by all Druggists and Dealers generally.

MADE IN U.S.A.

THE READY FAMILY SOAP MAKER:

LEWIS' LIVE

95 PER CENT. PURE.

FINELY POWDERED.

HIGHLY PERFUMED.

The strongest and purest Live made. Will make 20 pounds of the best Perfumed Hard Soap in 30 minutes without boiling.

The best water-softerener made.

The following are some of the advantages obtained by using Lewis' Live Soap:

First. It is packed in tin cans with a slip or removable lid, easily taken off and leaving the contents exposed, thereby by saving the trouble, annoyance, and danger from fire (partially) as with other Live Soap, which being solid in the cans, must be broken with a hammer to get the Live Soap.

Second. It is a fine powder, you can remove the lid and pour out all the contents, being always ready for use.

Third. A teaspoonful or more can be used as a water-softerener, scrubbing, etc., and the lid returned to the can, and thereby save the balance of contents. After other Live Soap is dissolved at once and used in a short time, the strength is gone.

Fourth. The best soap can be made in from ten to twenty minutes with this Live Soap.

Fifth. No failure is possible in making given are followed.

Sixth. One can of this Powdered Live Soap is equal to twenty pounds of Solid Soda or Washing Soap.

Seventh. One can of this Live Soap will save you more of grease than any other Concentrated Live Soap.

Eighth. This Live Soap is 25 per cent. stronger than any other Live Soap.

Ninth. One to two teaspoonfuls will soften a tub of the hardest soap.

Tenth. One teaspoonful will thoroughly cleanse Bins, Drums, Casks.

Unavailable for Keen Boaches, Mice, Rats, etc.

The best article for washing Tires.

C. W. JACKMAN,

H. G. CARTER,

January 11, February 14, 1890.

THE GAZETTE.

TUESDAY, MARCH 16, 1890.

MILTON.

—Hitchcock and Evans' parlor concert company gave a concert at college chapel on the evening of the 9th inst. The attendance was anything but large and the temperature of the room anything but comfortable. Mr. Hitchcock recited his selections in a pleasing manner, but his dictionary talent is not remarkable. He did himself the most credit in "The Moneyless Man" and "The Nevada Funeral." Mr. Evans is an artist in violin playing and exhibits good taste in his selections, the most pleasing number being "Through Darkness into Daylight." Mr. Pautsch is an excellent fiddler and his tones were good and his elocution tasty—and artistic. His best selection was the "Mocking Bird Medley." These gentlemen give a pleasing entertainment. We regret that our citizens did not accord them a more liberal support.

—W. H. Plumb has bought a new B flat clarinet recently, and will play that instrument in the band leader.

—The farmers report that clover fields that were pastured closely last fall have winter killed badly, the roots being thrown out by the action of the frost. Fields that were not pastured seem to be in good condition.

—Dry wood is becoming plentier than it was ten days ago and good second growth dry wood can be bought at four dollars per cord.

—The Band have taken their last ride on the steam yacht, Arrow, owned by Mr. Sturges, of Chicago, upon whose deck they have spent many pleasant hours while at Geneva Lake. The yacht was burned recently and the fire is supposed to have been the work of a incendiary. This was the fastest steamer on the lake and Mr. Sturges has the sympathy of the Band boys in the loss incident to her burning, and they would be glad to assist at the incineration of the cowardly villain who burnt her.

—Rance White, of this town, informs us that for some time he has been troubled with a cancer on the right breast and he decided to have Eliza Hudson, who is a pupil of Dr. Pond, of Aurora, Ill., try his hand at curing it. Mr. Hudson began the treatment and in eight days time removed the cancer, root and branch. If you want the particulars talk to White who feels very much pleased over the cure.

—A 13 year old boy, named George, of everybody has got it bad.

—H. H. Davy has had a heavy burden laid on his shoulders by the St. Paul Company. He is now obliged, in addition to being on duty during the day, to remain at the office until 12:30 a. m., which makes his opportunity to woo the drowsy god rather limited.

—Ira Flagg, who has been teaching at Johnson's Center during the winter, is stopping here at present.

—H. H. Pember makes the new tenor horn, that he has just bought, fairly ring. It is one of Lecomte & Co.'s light piston valve instruments and is a great addition to the instrumentation of the Band.

—A. M. Miller loaded his horse, wagon and team into a car on the morning of the 10th inst., and took passage therein for Nebraska, where he will plow and sow, reap and mow, and put money in his purse.

—M. J. Whitford, C. A. Smart and A. C. Whitford, who have been teaching, have finished their labors and will enter the College classes at the opening of the spring term.

—The Seventh-Day Baptist social will meet this, Thursday, evening at the residence of Rev. E. M. Dunn. All are cordially invited to be present and enjoy the pleasure incident to the occasion.

—M. T. Cole, who has been teaching near Denison, Iowa, during the winter, arrived in town Friday. He will return soon to Iowa with his team and farming tools, and begin work on his farm near Denison.

—Mr. Harris, of Milwaukee, in the employ of Dixon, the dry goods man, was in town this week.

—"Uncle" Fitch Brown, celebrated his eighty-fourth birthday last Sunday. His health is much improved and he is now able to be out of doors some.

—Smith and Davidson Bros. took in two car loads of cattle and two of live hogs on Monday. It made the burgh look quite lively once more.

—On Sunday, the 7th inst., Rev. A. L. P. Loomis, of the Congregational church, surprised his audience by reading his resignation as pastor of that church, to take effect the first of June. The society promptly called a special meeting, which unanimously asked him to withdraw the resignation, and adopted resolutions of approval of his ministry with that church.

—The friends of Rev. Loomis propose to give him a rousing do, Wednesday evening, the 24th inst., at the Congregational church. The ladies will provide supper, and will give full value received to all their patrons, at the modest rate of twenty-five cents. All are cordially invited.

CLINTON.

—Calvin Pratt has just added to his elevator by putting in a new twenty horse power boiler, an engine and feed mill and other things, which will provide support, and will give full value received to all their patrons, at the modest rate of twenty-five cents. All are cordially invited.

—The steam flouring mill has started up again, and is now with new and improved machinery, turning out better flour than ever.

—The Board of Trustees of the Deaf and Dumb Institute made D. G. Cheever, of this place, who is a member of that Board, a committee to lay plans for new buildings (to replace those burned last September) before the Legislature, and procure the necessary appropriations for that purpose, and likewise to furnish legislative committees with needed information in relation to the old site, the value of the property remaining, its availability for future use and kindred topics. This has made it necessary for Mr. Cheever to spend much of his time at Madison this winter. The object being satisfactorily accomplished, he is now at home again and much pleased with the results.

—Delavan is the happiest town in the State. After months of anxiety over the fate of the Deaf and Dumb Institute, it has been definitely settled that it will be rebuilt there. The Legislature has appropriated \$70,000 for that purpose, and \$30,000 for current expenses. When we consider the trials, tribulations and scandals the Institute has recently passed through, the strong opposition manifested at the opening of the session, to rebuilding at Delavan, the people of that town may very properly rejoice at their final success. The Baptist society of Delavan expect to build a \$10,000 church the coming season.

—Rev. E. B. Cummings, who has been dangerously ill for some time past, is slowly improving, and we hope to see him on the streets again soon.

—S. W. Serf, of Minneapolis, is in town for a few days. He tells his experience with mercury 45 degrees below zero.

—Mrs. Sloan and Mrs. Hoard will open a new millinery store in Hollister's block about the first of April.

—Lewis H. Larson has become a partner with H. A. Anderson in the grocery business.

—Messrs. Towle & Thompson, of Beloit, who have been pausing Drake's old store in ship shape, have opened up for business with a fine display of goods.

—Mrs. D. G. Cheever and daughter spent a portion of last week visiting friends in Madison and Milwaukee.

—Mrs. F. H. Swift accompanied her husband to Madison last week.

—Don't fail to see the new goods at Covert & Cheever's drug store.

—Mrs. Dr. Brouson, formerly Miss Mary Rankin, of this village, who has spent seven years with her husband as a missionary in Aram, lectured in the Baptist church last Sunday evening to a very full house of intensely interested listeners. She has acquired much knowledge of India and is thoroughly imbued with the missionary spirit.

—Rev. C. C. Marston has issued volume 1 of the Baptist Ensign, a sheet devoted to the interests of the First Baptist church of Clinton.

Andrew Jackson's Vow.

From the Daily States.

Shortly after the occupation of Pensacola and the expulsion of the Spanish authorities from Florida, by General Jackson, Mr. Edward Palfrey, an old citizen of New Orleans, now dead, was wont to relate that while standing behind the counter of the National Bank, his attention was directed to a group of military officers who entered the bank and stood for the cashier. The chief of the party was a man, stout, stern-featured, spare and wasted of form, but erect and firm of carriage.

The cashier having appeared, the chief introduced himself: "I am Andrew Jackson, Major-General of the United States Army, commanding the forces now occupying Pensacola. My soldiers are suffering greatly from the want of provisions, clothing and medicines. Immediate relief is required, and I must have \$30,000 to purchase them supplies. Here is my draft on the government. I desire to have it cashed."

The cashier was appalled by this demand. There was no authority to honor this check. The courteous but firm manner and the prestige of the chief, however, restrained any such intimation from the cashier. Requesting the General and his staff to be seated, he retired to the rear office of the President, and communicated the appalling demand of the conqueror of Florida. The President was equally alarmed and dispatched a messenger to convolve the Treasury. They quickly assembled, and the subject was referred to them.

It should be borne in mind that at that time General Jackson was regarded with a great deal of bitterness and distrust by a large political party in the country. He was looked upon as a dangerous and asserting military chieftain who menaced the autonomy and freedom of our institutions, and especially of such institutions as the great National Bank. The directors of the branch bank here were doubtless somewhat pervaded with this sentiment. Still the rules of the bank justified them in declining to advance the fund required by General Jackson, and the President was instructed to communicate this conduct of the Board.

He did so with all the stately usual on such occasions.

Then rising from his seat and advancing to the counter, behind which the polite President stood, the old chief asked:

"Do I understand you, sir, to say that this bank, having the money of the United States in its vaults, declines to advance a sum sufficient to supply the immediate needs of two thousand patriot soldiers whom I have left in the swamps of Florida exposed to terrors and starvation?"

With profound respect the rules must be observed.

Whereupon, with flashing eye and that terrible assever never forgotten by any one who ever beheld Old Hickory in a rage, the General, raising high his gauntleted hand, brought it down with great force upon the counter, exclaiming: "By the Eternal! I will live to serve your rascally bank as I have the Spaniards in Florida, as equally enemies of the people and of liberty."

With this fearful menace and vow he strode with his staff out of the bank. As he emerged from the bank, the General encountered two Irish born citizens and merchants of New Orleans, who had heard of the order of the bank, and had hastened to join the General, with offers to cash his draft and furnish all that he needed for his army.

MISCELLANEOUS.

SWORN EVIDENCE.

The following Cure is probably the most remarkable ever effected by any medicinal preparation for the treatment of Catarrh:

Gentlemen:—I hereby certify that I have had Catarrh for ten years, and for the last six years have been in a terrible state of suffering. I was rendered partially deaf, had buzzing in the head, pains across the temples, and in the back of the head, and in the neck, and in the chest, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra, and in the vagina, and in the uterus, and in the ovaries, and in the fallopian tubes, and in the peritoneum, and in the pleura, and in the lungs, and in the heart, and in the liver, and in the spleen, and in the pancreas, and in the gall bladder, and in the stomach, and in the bowels, and in the bladder, and in the prostate, and in the testicles, and in the penis, and in the urethra,
